
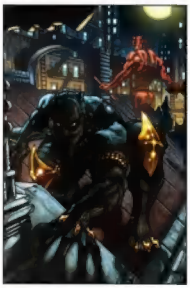
Case in point: After laying waste to several city blocks, vaporizing a few hundred Hand ninjas and turning the tumultuous life of our most turbulent hero upside down, Andy himself (along with artist Davide Gianfelice) will be taking Matt Murdock off the grid and into completely uncharted territory this January in DAREDEVIL: REBORN.

Just where can you turn when you've betrayed the trust you swore to uphold? Can Matt atone for the sins he committed against his friends and allies…and, more importantly, can he forgive himself? A major transformation is coming to the mantle of Daredevil and, once complete, the view from the streets of the Marvel Universe is going to look a whole lot different.

But with Hell's Kitchen still smoldering, who will step in to protect the Guardian Devil's flock? It's up to another displaced hero – one who carries with him a reputation steeped in honor, courage and awesome power – to keep the streets of New York safe...and it's probably not who most readers would expect.

Enter BLACK PANTHER: THE MAN WITHOUT FEAR – a complete and total paradigm shift for Daredevil's old stomping ground that will see Wakanda's greatest champion take to the rooftops of Hell's Kitchen, while struggling to cope with life as an exile. And that struggle is only going to heat up as a cadre of new threats goes straight for the jugular of a community – and a man – on the brink.



This post-Shadowland sea change amongst Marvel's heroes will also lead to some unexpected alliances. Ghost Rider. The Punisher. Elektra. Moon Knight. Silver Sable. Not exactly a team one would expect to honor the rules of war, let alone the code of the street. The story of how these new HEROES FOR HIRE come together to form Marvel's most unorthodox group – with a few surprise members waiting in the wings, to boot – is one that's big on bullets, light on mercy and nothing but wall-to-wall action.

But we're not only bringing established powerhouses to the forefront now that Daredevil's been taken off the board. Born out of the disastrous events of SHADOWLAND, the all-new Power Man thinks he's a one-man solution to the war on crime. He's young, temperamental and overly ambitious. Good thing Danny Rand, the Immortal Iron Fist, can rein him in…or can he? Look for this duo of hard-hitting, and completely unlikely heroes, to team-up – and face-off – only in POWER MAN AND IRON FIST.

If you thought SHADOWLAND upped the stakes about what was possible for our characters, get ready. From the back alleys to the spires on the skyline, the landscape of the Marvel Universe is about to change in some very drastic ways. It'll be risky, it'll be dangerous, but, in the end, it's gonna be one heck of a ride. Guaranteed.

See ya in the funny books!
